SPSS 22 Teaching & Research Installation Guide (for Windows)
Updated: 5/4/15

This instruction is written based on SPSS 22. SPSS 21 is still offered on the hub; however, we strongly recommend all users upgrade to the latest version. This instruction should be applicable to SPSS 21 or 23 on Windows 32 or 64 bits (with minor differences).

1. Click the link on the library data service website, or manually search “SPSS” in UVa software gateway. On the following webpage, click “Get from UVa Software” (highlighted by the red circle).

2. On the following page, click “Add to Cart” (as shown in the red circle).
3. Click “check out” when you are done adding all software. Otherwise, choose “continue shopping” to add more.
4. After clicking “Check Out”, agree the end user license agreement (EULA) to continue.

5. Read the important message shown. Remember to keep your order receipt page open along the installation process; SPSS requires special code to activate the product, and the code is only provided on the receipt screen (not in the email).
6. Type expected number of machines that will install SPSS using your account information. Note: “1” usually suffices. The site currently allows you to install on as many as University-owned machines.

7. Place the order by providing your first name, last name, and email. Check the box if you would like to receive email correspondence from the hub; otherwise, click “proceed with order” (on the bottom right corner).
8. You should then be directed to receipt screen. Click “Start Download” (on the top right of the “item” panel) to download the installation wizard; keep this page open so that you could refer to the activation code (underlined) during the installation process.

9. Click “Download” to begin.
10. Once download is finished, click on the downloaded file. The installation wizard should pop up with a status bar showing pre-installing progress.
11. Click “Next” to start.

12. On the popup screen, select “Authorized user license” and click “Next”.

Welcome to the InstallShield Wizard for IBM SPSS Statistics 22

The InstallShield™ Wizard will install IBM SPSS Statistics 22 on your computer. To continue, click Next.

- Authorized user license (I purchased a single copy of the product.)
- Concurrent user license (My organization purchased the product and my administrator gave me a computer name or IP address.)
13. Accept the license agreement and continue.

14. Type your username (preferably UVa computing ID) and use “University of Virginia” as your organization.
SPSS 22 T&R for Windows instruction

15. Select additional help language, if needed.

16. If you need JAWS for windows screen reading enabled for SPSS, click “Yes”. Otherwise select “No” and continue.
17. Install Python Essentials if your computer hasn't installed Python support. Then click “Next”.

18. Accept terms of the license agreement for Python and continue.
SPSS 22 T&R for Windows instruction

19. You’re allowed to customize the installation path; if not specified, SPSS will be installed at default location.

20. Click “Install” to begin the process.
SPSS 22 T&R for Windows instruction

21. The wizard should start installing with a green bar showing current progress.

22. Once installation completes, the wizard will ask for active license. Select the box if you would like to register for product update; otherwise click “Done”.

License IBM SPSS Statistics 22

InstallShield Wizard has successfully installed IBM SPSS Statistics 22.

Click OK to start the license authorization process. You will need the authorization code that was included with your software to get a license.

Click here to register for product updates and special offer alerts. Two minutes is all it takes!
23. Select “License my product now” and click “Next”.

24. Copy and paste the activation key on the receipt screen (refer to step 8 here). Click “Next” to allow the wizard to communicate with IBM server.
25. Once authorization is done, you should see the following screen with green checkmark. Click “Next” to continue.
26. Click “Finish” to exit the installation guide. SPSS 22 T&R for mac has been successfully installed on your computer.

You might be prompted to restart the computer for configuration purpose. Choose “Yes” to restart now or “No” for later.

If you encounter any issues during installation, please email res-consult@virginia.edu with problem description and (if applicable) screenshot.
