SPSS 23 Admin for Mac instruction

SPSS 23 Admin Installation Guide (for Mac)
Updated: 6/24/15

This instruction is written based on SPSS 23. SPSS 22 is still offered on the hub; however, we strongly recommend all users upgrade to the latest version.

1. After going through the order process on UVa Software, you should then be directed to receipt screen. Click “Start Download” (highlighted by the red rectangle) to download the installation wizard; keep this page open so that you could refer to the activation code (underlined) during the installation process.
2. Click “Download” to get the installation pack.

3. Once download is finished, click on the downloaded file. On the following screen, click the blue icon to start installation.
4. Choose your preferred language, then click “OK”.

5. Read the introduction, then click “Next”.
6. At the “License Type” step, choose “Concurrent user license” and click “Next”.

7. Accept the license agreement and continue.

10. Select additional help language, if needed.

11. Install Python Essentials if your computer hasn't installed Python support. Then click “Next”.

Install IBM SPSS Statistics – Essentials for Python

- Yes
- No

This version of Essentials for Python includes:
- Python version 2.7
- IBM SPSS Statistics 23 – Integration Plug-in for Python
- Python Extension Commands for SPSS Statistics
12. You’re allowed to customize the installation path; if not specified, SPSS will be installed at default location.

13. Review the following information before proceeding. If everything looks good, select “Install”.
